

Committed to Australia

At Aurobindo we are committed to partnering with you as you navigate challenges and maximise opportunities arising from the changing Australian Healthcare landscape.

We know that having a broad range of products for your patients is integral for generic substitution. Drawing on our global support system we aim to offer Australian pharmacies one of the widest product ranges through a series of continual launches taking advantage of the many expiring patents over the next 2 years.

With the support of our experienced sales team we want to be your long-term trusted partner in generics.

We want to help you make the important decisions that ensure quality medicines are accessible for all Australians.

Launching
In March
2012
