DELPHON SHOWCASING CUSTOM POLYMER FILMS FOR FLEXIBLE HYBRID ELECTRONICS AT FLEX 2017

HAYWARD, CA JUNE 12, 2017 Delphon an industry leader in polymer and adhesive film products for the electronics and medical industries, will be showcasing its custom films for Flexible Hybrid Electronics (FHE) at the upcoming FLEX 2017 show June 19-22 in Monterey, CA.

Delphon's in-house R&D team along with a number of industry-leading electronics and materials manufacturers have developed a range of polymer films that can be customized for flexible hybrid electronic applications. With the ability to control properties such as tack, texture, stretchability, and printability, the company is able to work with customers on today's next generation products.

The FLEX conference is one of the largest FHE events in the industry. Its mission is to advance both technical and business interests in flexible, printed, and hybrid electronics and their applications. Delphon will be exhibiting their latest film materials in Booth 2009.
