DELPHON SHOWCASING CUSTOM POLYMER FILMS, GEL-PAK CARRIERS, AND ULTRATAPE PRODUCTS AT SEMICON 2017 – BOOTH 6057

HAYWARD, CA JULY 7, 2017 Delphon an industry leader in polymer and adhesive products for the electronics and medical industries, will be showcasing its custom films, Gel-Pak device carriers and UltraTape cleanroom tape and label products at the upcoming Semicon West Show in San Francisco, CA.

Delphon's in-house R & D team has developed a range of polymer films that can be customized for electronic and medical applications. With the ability to control properties such as tack, texture, stretchability, and printability, the company is able to work with customers on next generation products.

Delphon's Gel-Pak products protect fragile components during shipping handling and processing. These Gel-coated carriers and films securely hold devices in place to prevent damage and help companies increase product yield.

UltraTape offers cleanroom tape and labels for semiconductor processes including masking, product marking, cleanroom construction, ESD and high temperature applications. The company's tapes are particle and residue free and are low outgassing to protect critical environments.

About Delphon:

Delphon provides innovative polymer and adhesive solutions to high-technology industries. For over 35 years, the company has developed breakthrough products that provide solutions for manufacturing processes in a wide range of markets. The company operates three divisions that are recognized worldwide for their high-quality brands like Gel-Pak, UltraTape, and TouchMark. Customers from around the globe know that they can trust these brands even in the most critical environments.
