

## Spring has arrived! You'll need to act quickly to have a thriving backyard lawn in time for summer.

Hello Jenny,

There's no need to panic, but if you're looking forward to enjoying a luscious summer lawn, planting needs to start soon now spring's here.

A big challenge faced by gardeners is selecting the most suitable grass species for their lawn. **Nobody wants the hassle or expense of replanting...** so it's crucial to make the right seed choice upfront. Especially when time is ticking and sowing should be started soon.

At Native Seeds Pty Ltd we understand Australian backyard conditions and often recommend [Griffin Weeping](#) grass or our seed mixes due to their superior **shade tolerant** properties. Likewise, [Oxley Wallaby](#) and Redgrass are also very popular native lawn choices.

To celebrate spring, all seed orders placed [online](#) on or before **September 18** will receive a FREE Seedling ID Guide **plus** a Step-by-Step Guide on Growing Your Native Lawn.

**You can read more about our range of native grasses [here](#) or head straight to our [online store](#) to get your native grass lawn started today!**

With over 20 years experience, I'm here to help you have a beautiful native seed lawn which is low maintenance, low watering and great for the environment.

Just press <REPLY> to ask me any questions, or call 1-300-SEEDS today.

Carol  
Native grass seed specialist

PS. Remember one free 15 minute telephone consultation will relieve you of any guesswork. We'll assist you to purchase grasses guaranteed to suit your lawn environment and lifestyle.
